## NanoSpeed ${ }^{\text {TM }}$ Dual-stage 1x1 Series Fiber Optical Switch (SM, PM, High Power)

(Protected by U.S. patent 7,403,677B1 and pending patents)

## Product Description

The NS Series dual-stage $1 \times 2$ solid-state fiber optic switch connects optical channels by redirecting an incoming optical signal into a selected output optical fiber. This is achieved using patent pending non-mechanical configurations with solid-state all-crystal designs, which eliminates the need for mechanical movement and organic materials. The dual-stage series of NS fiber-optic switch is designed to meet the demand of high cross-talk in addition of ultra-high reliability, fast response time, and continuous switching operation. The device is bidirectional.

Agiltron's PCB driver listed in the web is recommended to operate this device, featuring high efficiency and low cost with 12V DC power and TTL control signal.

## Performance Specifications

| NS Series Dual-stage 1x1 Switch |  | Min | Typical | Max | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Central wavelength ${ }^{[1]}$ |  | 780 |  | 1650 | nm |

[1] Operation bandwidth is $+/-25 \mathrm{~nm}$ approximately at 1550 nm .
[2] Measured without connectors. For other wavelength, please contact us.
[3] Defined at $1310 \mathrm{~nm} / 1550 \mathrm{~nm}$. For the shorter wavelength, the handling power may be reduced, please contact us for more information.
