

RF over Fiber CWDM 8 Channel Mux/Demux

Key features:

- Low insertion loss
- High channel isolation
- Low PDL
- High reliability
- Telcordia GR-1221 compliance
- Optical add/drop multiplexing

RFOptic's CWDM 8 channel multiplexer (mux) / demultiplexer (demux) devices use multiple wavelengths to transport information over fiber.

This makes the device highly suitable for access networks that require additional bandwidth.
